DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-3 are rejected under 35 U.S.C. 102(e) as being anticipated by Gilmour (U.S. Patent No. 6,837,863). Gilmour discloses in Figures 1-3 a body joint liner (1) comprising elements as recited in these claims including a depressed area or the ankle support area (4), a channel (5) runs axially along the liner (1) with one closed end and one open end.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 4 and 5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gilmour (U.S. Patent No. 6,837,863), as presented above, and further in view of Peters (U.S. Patent No. 5,676,642). Gilmour discloses in Figures 1-3 a body joint liner (1) comprising elements as

recited in these claims but does not teach a cover, as recited. Peters discloses in Figure 3 an ankle brace (2) comprising inner pivot leg (6) and outer pivot leg (8), and cover strips (48) adhered to outside of legs (6, 8). Therefore it would have been obvious to one skilled in the art to provide cover strips suggested by Peters onto the outer face of Gilmour's joint liner as such would provide additional support.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
